

Hearing aid safety clips

This leaflet is about safety clips to help keep your hearing aid safe

About hearing aid safety clips

Hearing aid safety clips can help you not to lose your hearing aid.

They normally have 1 clip and 2 rubber loops.

The rubber loops go around the hearing aids.

And the clip attaches to the collar of your t-shirt or jumper.

So if the hearing aid falls out of your ear, it will still be attached to your collar. It will hang down but you won't lose it.

You can buy safety clips on the internet.

You can find information online about:

Hearing aid safety clips or **retention cord for hearing aids.**

Lots of different companies sell them.
